

Bosch to demonstrate integration of IP cameras with third-party software at ASIS International 2011

September 16, 2011

FAIRPORT, N.Y. – Bosch Security Systems, Inc. will demonstrate the interoperability of its IP and high definition cameras with third-party video management systems at ASIS International 2011. Five different models of Bosch fixed and pan-tilt-zoom IP and HD cameras will be on display in various booths throughout the show. The cameras' highly detailed video streams will be shown using several video management software offerings.

“Bosch is committed to working with other industry solution providers to offer customers choice in the software platforms they use to view and control their video streams,” said George Maroussis, product marketing manager, Bosch Security Systems, Inc. “Through our conformance with the ONVIF standard and the open availability of our video software development kit to solution providers, we make it easy for security dealers to integrate Bosch IP cameras, encoders and our Intelligent Video Analysis with any third-party software.”

Bosch products will be exhibited in the following booths at ASIS International 2011:

- Exacq Technologies Inc. will demonstrate the AutoDome Junior HD 1080p and the IP 200 Series HD 720p with its exacqVision video management software – Booth #3451
- Genetec will display video from the IP 200 Series and the AutoDome 800 HD 1080p cameras using its Security Center Unified Security Platform and Omnicast Video Surveillance Solution – Booth #846
- Milestone Systems will showcase the IP 200 Series HD 720p and the Dinion HD 720p with its XProtect IP Video Management Software – Booth #1325
- OnSSI will highlight the Dinion HD 720p using its Ocularis video and security platform – Booth #1465

The Bosch division Security Systems is a leading global supplier of security, safety, and communications products, solutions and services. Some 12,000 associates generated sales of 1.36 billion euros (\$1.93 billion) in fiscal 2010. Protection for people's life, buildings and assets is the aim. The product portfolio includes video surveillance, intrusion alarm, fire alarm and voice evacuation systems as well as access control. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security Systems develops and manufactures in its own plants across the world. Additional information can be accessed at www.boschsecurity.us.

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial drives and control technology, power tools, security and communication systems, packaging technology, thermotechnology, household appliances, solar energy, healthcare and software innovations. Having established a regional presence in 1906, Bosch employs over 22,000 associates in more than 100 locations, with reported sales of \$8.8 billion in fiscal 2010.

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 285,000 associates generated sales of 47.3 billion euros (\$62.7 billion) in fiscal 2010. The Bosch Group comprises Robert Bosch GmbH and its more than 350 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Bosch spent 3.8 billion euros (approximately \$5 billion) for research and development in 2010, and applied for over 3,800 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.
