

Bosch Introduces Two Terabyte Hard Drives for its 700 Series Recorders

August 9, 2010

On-site expansion option offers up to 8TB of storage

FAIRPORT, N.Y. – Bosch Security Systems, Inc. has introduced a two terabyte storage expansion kit for its Divar XF and the 700 Series Network and Hybrid Digital Recorders. The new kit enables customers to increase the internal storage capacity of the recorders to up to eight terabytes.

With the systems' advanced H.264 compression technology and the storage expansion kit, customers can depend upon the recorders to meet the most demanding requirements for image quality and retention times. For example, the Divar 700 Series Network Recorder, which supports 32 IP channels, can now hold up to 45 days of real-time, continuous 4CIF recording. The disks can also operate in RAID-4 configuration to prevent the loss of recorded data if a single hard disk should fail. This optional RAID configuration can be added by simply installing a low-cost software license to any Divar XF or 700 Series Recorder.

The new storage expansion kit contains a two terabyte hard disk, mounting screws, an Electrostatic Discharge wrist band and a quick installation guide. The addition of the new kit brings the total number of hard-drive expansion kits for the 700 Series to three, including the 500 GB and one terabyte options previously available.

The kits support the latest version of Self-Monitoring, Analysis and Reporting Technology that warns a user or system administrator of impending drive failure while there is still time to take preventative action. This technology helps improve system reliability by significantly decreasing the possibility of data loss. As all drives are accessible from the front of the units, customers can easily service the drives or add larger capacity disks without having to uninstall the recorders.

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 275,000 associates generated sales of \$53 billion (38.2 billion euros) in fiscal 2009. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for growth. Each year, Bosch spends more than \$5 billion (3.5 billion euros) for research and development, and applies for some 3,800 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial drives and control technology, power tools, security and communication systems, packaging technology, thermotechnology, household appliances, solar energy and healthcare products. Having established a regional presence in 1906, Bosch employs over 20,000 associates in more than 70 locations, with reported sales of \$7.3 billion in fiscal 2009.

Bosch Security Systems, Inc., a division of the Bosch Group, develops and markets a broad range of products and systems for security, video surveillance, life safety, personnel and asset tracking applications, as well as for communication and professional audio installations. Worldwide, Bosch Security Systems employs more than 11,600 associates and reported sales of \$1.8 billion in fiscal 2009. For more information, visit www.boschsecurity.us.
