

BOSCH RELEASES NEW EXTREME SERIES IP CAMERAS

November 17, 2008

FAIRPORT, N.Y. – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security solutions, announces the release of its Extreme Series IP Cameras. Combining advanced optics, active-infrared illumination, IP connectivity and on-board Intelligent Video Analysis in a ruggedized housing, the six camera models deliver uncompromised networked surveillance in all lighting and environmental conditions.

The EX30, EX80, EX82 and EX85 models are all-weather outdoor IP cameras engineered and calibrated to provide high performance day-night imaging, making them ideal for perimeter and general surveillance for industrial, commercial and critical infrastructure applications. Incorporating Black Diamond night vision, these cameras produce clear images in low-light and no-light environments, enabling the nighttime function of built-in video analytics for true around-the-clock surveillance. High-signal, low-noise video also reduces network bandwidth and storage requirements, resulting in a more stable IP surveillance system.

The EX7 and EX36 models are specifically designed to meet the needs of locations with specialized surveillance and design requirements, such as correctional facilities and hospitals. The cameras feature a U.S. patented No Grip design, making them impossible to grip or hang from to help ensure maximum safety in high-risk environments. Constructed of cast aluminum, EX7 and EX36 are also vandal-resistant, allowing them to withstand acts of sabotage to provide continuous video vigilance.

Producing high quality video, integrating seamlessly with IP networks and enabling optimized performance of video analytics in the most demanding imaging conditions, Extreme Series IP cameras meet the 24/7 surveillance requirements of critical security projects. About Bosch Security Systems, Inc.

Bosch Security Systems, Inc., a division of the Bosch Group, develops and markets a broad range of products and systems for security, video surveillance, life safety, personnel and asset tracking applications, as well as for communication and professional audio installations. Worldwide, Bosch Security Systems employs nearly 10,800 associates and reported sales of \$2 billion in fiscal 2007. For more information, visit www.boschsecurity.us or call (800) 289-0096.

About the Bosch Group

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros (over \$63 billion) in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than three billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."

In North America, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial automation and mobile products, power tools and accessories, security technology, thermo-technology, packaging equipment and household appliances. Bosch employs approximately 25,000 associates in more than 80 locations throughout the U.S., Canada and Mexico, with reported sales of \$9.5 billion in fiscal 2007.
