Innovations from Bosch Security Systems in North America

Bosch Security Systems' facility in Fairport, New York, serves as the global headquarters for the company's Intrusion business unit. Associates at this facility are involved in research for a range of components for intrusion detection systems and submitted 12 developments to the patent office for first filing in 2007. In addition, five patents were granted to the Bosch Group last year for filings submitted by Fairport associates in previous years. These innovations include advancements in false alarm reduction and in lenses used in intrusion detectors.

In total, technological advancements in intrusion and fire detection systems developed by Bosch Security Systems associates in North America have resulted in more than 70 patents in 40 years.

In Lancaster, Pennsylvania, engineering teams at Bosch Security Systems' facility are focused on advancing video surveillance technology. In 2007, these associates submitted three developments to the patent office for first filing in 2007. In addition, two patents were granted to the Bosch Group last year for filings submitted by Lancaster associates in previous years. These innovations were developed for use in the new AutoDome Modular Camera System.

Overall, Bosch Security Systems associates worldwide have achieved advancements in video surveillance technology – including camera housings and controls, object tracking and motion detection, and video recording – that have resulted in more than 50 patents in 15 years.
