

# Extreme in Action: Tropical Night Vision Goes Extreme

**BOSCH**

Invented for life

“My clients spend time and money on making their homes look beautiful. The last things they want are overbearing floodlights to ruin the ambience of the setting. At the same time, it’s important that the homes are protected and under video surveillance at all times . . . especially in the middle of the night. The EX82 is by far the best day-night color camera I’ve ever used.”

Rory Knowles, Bahamas Security

**Project:** Luxury Homes  
**Sector:** Residential  
**Product:** EX82 Infrared Imager

## Tropical Night Vision Goes Extreme

Oceanfront properties, sprawling gardens and pristine swimming pools at million dollar homes are the environments in which Rory Knowles of Bahamas Security has built his reputation as the premier security integrator in the Bahamas. With the high importance placed on aesthetics, one of Knowles’ biggest challenges is finding ways to overcome low ambient lighting, ranging from elaborately designed mood lighting to pitch black darkness.

### Problem: Achieving Covert Night-Time Surveillance

- Surveillance equipment must be effective on a 24/7 basis
- Low light cameras deliver low-quality video surveillance
- Installing floodlighting would ruin the appearance of the home at night
- Excessive lighting is unsightly and disturbs neighbors

### Solution: Bosch Extreme CCTV EX82 Delivers Covert Night Vision Performance

- EX82’s active infrared illumination is invisible to the human eye
- Black Diamond infrared technology delivers detection-level imaging to 250ft (75m) in low light and no light
- High-resolution imaging, color by day and infrared by night
- Covert illumination does not affect ambient lighting schemes or disturb neighbors

### Results: Effective, Discreet Video Surveillance

- Video vigilance around the clock, day and night
- Beautiful night-time ambience
- Improved residential security and customer satisfaction
- Increased property value and decreased crime
