

BOSCH PROFESSIONAL SERIES INTRUSION DETECTORS WIN AWARDS AT IFSEC 2008 AND SICUR 2008

June 5, 2008

FAIRPORT, N.Y. – Bosch Security Systems, Inc., a full-line manufacturer of high-quality security solutions, announced today that the Professional Series of intrusion detectors have won two prestigious awards.

The latest additions to the Professional Series, featuring Bosch's innovative new Anti-Mask technology, won the Intruder Alarm Product of the Year Award at this year's IFSEC Exhibition held in Birmingham, UK. Winners of the IFSEC Security

Industry Awards are selected on the basis of technological innovations that influence and shape the industry, celebrating the very best solutions and initiatives in product innovation, installation and protection. Bosch's new Anti-Mask technology utilizes patented prism lenses and active infrared detection to protect against all known forms of attack, including objects covering or placed in front of the detector, providing superior protection against sabotage.

Bosch's new Professional Series detects intruders without triggering false alarms caused by moving plants, small animals or car headlights. The detectors are based on Bosch's Sensor Data Fusion (SDF) technology, which interactively processes data from up to six different sensors to virtually eliminate false alarms and improve detection levels by up to 35 percent compared with traditional detectors.

At the International Security, Safety and Fire Exhibition (SICUR) held at Feria de Madrid, the Professional Series was also selected for inclusion within the Security category of the exhibition's 'Gallery of New Products.' The exhibition is held every year with the aims of promoting research, development and innovation within the field of security and defining the practical applications of new products and services in this field. Only products that are clearly ahead of the current state-of-the-art systems are selected by the judges for inclusion in the gallery.

About Bosch Security Systems, Inc.

Bosch Security Systems, Inc., a division of the Bosch Group, develops and markets a broad range of products and systems for security, video surveillance, life safety, personnel and asset tracking applications, as well as for communication and professional audio installations. Worldwide, Bosch Security Systems employs nearly 10,800 associates and reported sales of \$2 billion in fiscal 2007. For more information, visit www.boschsecurity.us or call (800) 289-0096.

About the Bosch Group

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros (over \$63 billion) in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than three billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."

In North America, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial automation and mobile products, power tools and accessories, security technology, thermo-technology, packaging equipment and household appliances. Bosch employs approximately 25,000 associates in more than 80 locations throughout the U.S., Canada and Mexico, with reported sales of \$9.5 billion in fiscal 2007.
