

Bosch Adds ONVIF Compliant Dome Cameras to the 200 Series of All-in-One Surveillance Systems

July 26, 2010

FAIRPORT, N.Y. – Bosch Security Systems, Inc. has added two IP dome cameras to its 200 Series of ready-to-use, complete network video surveillance systems. Inside the discreet, compact domes, the NDC-255-P features a 2.8 - 10 mm varifocal lens, and the NDC-225-P includes a 4.0 mm fixed lens. The cameras are ideal for small offices, retail shops, convenience stores, and classrooms, where both professional security features and affordability are essential.

The 200 Series IP cameras, now including four models, are easy to install and operate. Each camera comes with a Secure Digital (SD) flash memory card for storing days of recorded video without a connected PC. No technical expertise is required to set-up the cameras. Customers simply insert the SD card, plug in the camera with a single cable, and viewing and recording starts immediately.

This all-in-one surveillance series can also be easily extended by connecting a video recorder, such as the Bosch Divar 700 Series, or an iSCSI server. Efficient H.264 image compression reduces the requirements for storage by up to 50 percent compared to traditional surveillance technology, an important cost-saving feature.

The progressive scan cameras provide professional surveillance with sharp, clear color images – even when objects are in motion. The cameras' bundled software enables remote viewing, allowing recorded video from multiple cameras to play back on a single PC monitor. The software also makes it easy to archive video and locate specific events quickly using its smart search facility.

In addition, the IP Camera 200 Series features built-in motion, tamper and audio detection that can trigger an action, such as setting off an alarm or

increasing recording quality to capture more details in a scene. The two-way audio capability also allows operators to communicate with visitors, employees or intruders via the camera.

Fully compliant with the latest Open Network Video Interface Forum (ONVIF) standard, the IP Camera 200 Series offers compatibility with other ONVIF surveillance products. This helps users save on future upgrade or migration costs.

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 275,000 associates generated sales of \$53 billion (38.2 billion euros) in fiscal 2009. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for growth. Each year, Bosch spends more than \$5 billion (3.5 billion euros) for research and development, and applies for some 3,800 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial drives and control technology, power tools, security and communication systems, packaging technology, thermotechnology, household appliances, solar energy and healthcare products. Having established a regional presence in 1906, Bosch employs over 20,000 associates in more than 70 locations, with reported sales of \$7.3 billion in fiscal 2009.

Bosch Security Systems, Inc., a division of the Bosch Group, develops and markets a broad range of products and systems for security, video surveillance, life safety, personnel and asset tracking applications, as well as for communication and professional audio installations. Worldwide, Bosch Security Systems employs more than 11,600 associates and reported sales of \$1.8 billion in fiscal 2009. For more information, visit www.boschsecurity.us.
